

i want to Print like this:

```

*
* *
* * *
* * * *
* * * * *
  
```

Note: Space is Counted only if it is present before the starting of character (or) b/w two character not at the end

row = 1

while (row <= 5):

col = 1 - each col has minimum one value

while (col <= row): because: want only 5 value in each col.

Print (" * ", end = " ")

col = col + 1

Print()

row = row + 1

* is a manual value so write in double quotes then it is a string so write in double quotes one start to another star we have space

if they ask to take row number from user

num = int(input("enter a row num: "))

row = 1

while (row <= num):

col = 1

while (col <= row):

Print (" * ", end = " ")

col = col + 1

Print()

row = row + 1

col <= row

row = 1

col = 1

logic

row = 2

col = 1, 2

row = 3

col = 1, 2, 3

when user giving 8 of row number it will Print like this

```

*
* *
* * *
* * * *
* * * * *
* * * * *
* * * * *
* * * * *
  
```

Now, i want to print like this

```

* * * * *
* * * *
* * *
* *
*
  
```

i = 1

while (i <= 5):

j = 5

while (j >= i):

Print ("*", end=" ")

j = j - 1

Print ()

i = i + 1

j value 5 times Repeat
j loop should repeat
it is count how many times it should repeat
loop i in work
got demised

i = 1
j = 5, 4, 3, 2, 1
i = 2
j = 5, 4, 3
i = 3
j = 5, 4, 3
i = 4
j = 5, 4
i = 5
j = 5

Next i become 2
i = 2
j = 5 - again j will start from 5

5 >= 2
4 >= 2
3 >= 2
2 >= 2
1 >= 2 X

whenever i = 1

1 <= 5 true

j = 5 - initialize

j >= i

5 >= 1 - true

~~i = 1, j = 5~~
~~i = 1, j = 4~~

5 >= 1

i = 1, j = 5

Next j become decremented
again it come to j loop not got to i loop
j = 4 - j decremented
4 >= 1

i = 1, j = 4

ok, i value constant
3 >= 1
i = 1, j = 3

* * *

2 >= 1

i = 1, j = 2

* * * *

1 >= 1

i = 1, j = 1

* * * * *

loop got stopped
i = 1, j = 0
j stops now

1. Don't do Print Ques. H.R. &

1
2 2
3 3 3
4 4 4
5 5 5 5

i = 1
j = 1
i = 2
j = 1, 2
i = 3
j = 1, 2, 3

i is constant
in every loop
i value is
only one
value

```
for i in range(1, 6, 1):  
    for j in range(1, i+1, 1):  
        Print C, end=" "  
    Print()
```

Note: For every Program write try to do ~~code~~ in both for & while.
for once & then try with while also one.

1 2 3 4 5
1 2 3 4 5
1 2 3 4 5
1 2 3 4 5
1 2 3 4 5

```
for i in range(1, 6, 1):  
    for j in range(1, 6, 1):  
        Print Cj, end=" "  
    Print()
```

```

# # # # #
# # # #
# # #
# #
#

```

i want to print this Using nested for loop

~~for i in range(1, 6, 1):~~
~~for j in range(1, i+1):~~

for i in range(5, 0, -1)

for j in range(i):

Print("#", end=" ")

Print()
